La'aseed Lavo, Motzie H'K'B'H Chama MeNirtaka
When the Moshiach comes, G-d is going to take
Sun out of its Covering.

A few weeks or months ago, I had this very idea that I am now going to write about. However, last night at the Purim Se'uda at Rabbi Eli Noson Silberberg's house, Rabbi Eli Noson Silberberg (the Rosh HaYeshiva of the Lubavitch Mesivta in Chicago) told over this idea fully to all the people at the table.

One limitation--- this Chidush Torah is only ba'derech efshar, in a way of possibility. This idea is possible, but we don't yet know if this is the matzius, the state of existence. However, it is very likely that it is the matzius, the state of existence.

It says in Torah--- La'aseed lavo, motzie HaKadosh Boruch Hu chama ma'nirtaka, rasha'im nidonin bo, (va'Tzadikim nisrapin bo). Translated--- in the time of the Moshiach, G-d is going to take the Sun out of its covering, and wicked people will be judged (punished) by it, and righteous people will be healed by it.

In the last several years many scientists have been saying that there is a new thing in the world called global warming. That the temperature in the world and all over the world is going up and getting warmer, and that this is dangerous for the world. There are others that don't agree about the global warming happening or that it is not dangerous. Yet, most of the evidence points in the direction that there is global warming.

Rabbi Eli Noson Silberberg, at the Purim meal, said that this matter of global warming could be what it says in Torah that when the Moshiach comes that G-d is going to take the Sun out of its covering and wicked people will be judged by it (punished) and righteous people will be healed by it (and all Jews are righteous, as it says in Torah, va'amach kulam Tzadikim).

I have never ever heard from secular sources that scientists know about this that it says in Torah that the Sun has a sheath, a covering. But we Jews, for thousands of years, have known that G-d created the Sun with a sheath, a covering. As it says in Rashi at the beginning of Parshas Va'Yera, (the section of the Torah called Va'Yera) that G-d took the sun out of its covering so that Avraham wouldn't be bothered by having to attend to guests passing by.

The idea about G-d taking the sun out of its sheath when the

Moshiach comes was what Rabbi Eli Nason Silberberg said, even though I thought the same thing a few weeks or months ago.

Yet, this next idea is my idea--- since the Lubavitcher Rebbe said between 5751 and 5752 (1991 and 1992), and he said it many times, that we are now literally one moment before the coming of the Moshiach, therefore, I want to say that this global warming COULD very well be the fact that G-d RIGHT NOW is in the process of ACTUALLY starting to bring the Moshiach in the true and complete redemption by ACTUALLY taking the sun out of its sheath, its covering.

And as the Lubavitcher Rebbe always said, Action is the Main Thing--- so we all must do everything we can the speed up the coming of the Moshiach by doing the Torah and its Commandments to the best of our ability, and according to the Rebbe, especially to learn matters in Torah that speak about the Moshiach and the Redemption, which the Rebbe said is the best way to actually bring the Moshiach immediately !!!!
